- Transportation to/from Clean Communities field trips can be paid for through Clean Communities grant funds.

Please Note: You may find other appropriate field trip options that are not included on this list.

Watershed Education & Urban Fishing Program (for students from underserved communities): NJDEP offers Environmental Stewardship through Urban Fishing

This Watershed Education & Urban Fishing Program (UWEP) is designed to educate children from urban areas in New Jersey about their local watershed. Children learn how people's actions, including their own, can affect water quality, other living creatures, as well as human health. The program also empowers students with choices they can make that will help to protect their water resources. This program is funded through a Grant with the Hackensack Riverkeepers.
